[Portfolio Web](#)

Address: San José, Costa Rica

I am an Architecture graduate with over two years of professional experience working in an interior design studio, where I have contributed to projects of diverse typologies and scales, including residential, commercial, cultural, and hospitality design. This exposure has allowed me to develop a solid understanding of how architectural concepts adapt to different programs, users, and contextual conditions.

My work focuses on translating design ideas into clear and buildable architectural solutions through architectural drawings, 3D modeling, and visual representation. Using tools such as AutoCAD, Revit, SketchUp, and Adobe Creative Suite, I approach each project with a balance of technical precision and design sensitivity, seeking to create functional, coherent, and meaningful spaces while continuing to grow professionally within collaborative design environments.

EDUCATION:

- >> **2025** BArch. *Universidad Latina de Costa Rica*
